

Success Story

Reference installation of 2N® Helios IP

Name of the customer/project

Apartments in 1 Scotts Street Brisbane, Australia.

Industry/field of the customer

Large residential solution

Project Requirements

The Scott Street apartments are a premium apartment development that includes a residential tower and two renovated heritage listed villas. The property has excellent views over the Story Bridge and Brisbane River to the city and beyond to Moreton Bay. The developer, Waterford Properties, was seeking an attractive and integrated control solution in keeping with the level of luxury provided by the building and fit-out. Additional security was provided by installing extra door stations in lift wells, preventing any unauthorised movement to or from the car park. A keyless access system was integrated in the intercom panels using a PIN code unique to each resident.

Solution

Solution was based on an Asterisk SIP Server. Helios IP 1 Button + Camera + Keypad, completed the solution to make direct video calls from the Lift wells or car park to each apartment's SIP Panel and GXV3140 Grandstream Multimedia Phones. This was the best solution to support IP System throughout the complex.
